Engine Power Rating Information

The gross power rating for individual gas engine models is labeled in accordance with SAE (Society of Automotive Engineers) code J11940 (Small Engine Power & Torque Rating Procedure), and rating performance has been obtained and corrected in accordance with SAE J1995 (Revision 2002-5). Actual gross engine power will be lower and is affected by, among other things, ambient operating conditions and engine-to-engine variability. Given both the wide array of products on which engines are placed and the variety of environmental issues applicable to operating the equipment, the gas engine will not develop the rated gross power when used in a given piece of power equipment (actual "on-site" or net horsepower). This difference is due to a variety of factors including, but not limited to, accessories (air cleaner, exhaust, charging, cooling, carburetor, fuel pump, etc.), application limitations, ambient operating conditions (temperature, humidity, altitude), and engine-to-engine variability. Due to manufacturing and capacity limitations, Briggs & Stratton may substitute an engine of higher rated power for this Series engine.

CARTER DE TONDEUSE

REMARQUE: Toutes les dimensions de composant sont don-

nées en pouces E.-U. --1 pouce = 25,4 mm.

L'informaiton de Classification de Pouvoir de moteur

Le pouvoit buté évaluant pour les modèles de moteur de gaz individuels est conformeément éligible à SAE (la Société d'ingénieurs Automoteurs) le code J11940 (le Petit Pouvoir de Moteur & le Moment de torsion Evaluant la Procédure), et l'exécution de classement a été obtenue et a été corrigé conformeément à SAE J1995 (la Révision 2002-5). Le vérifiable Pouvoir de moteur brûl sera plus bas et est affecté par, entre autres choses, les conditions d'opération ambiantes et le moteur-a-la variabilité de moteur. Donne les deux tabl-eau large de produits sur lesquels moteurs est placé et la variété de problèmes écologiques applicables à l'équipement, le moteur de gaz ne développera pas le grossesse évalue quand utilise dans un morceau donne d'équipement. Certe différence dans la rasion d'une assortiment de facteurs inclut, mais pas limite à, les puissance ventable, « sur place » ou nette). Certe différence est en rasion d'une assortiment de facteurs inclut, mais pas limite à, les accessoires (le nettoyeur d'air, l'échappement, chargeur, refroidissement, carburateur, pompe de carburant, etc.), les limitations d'application, les conditions d'opération ambiantes (la température, l'humidité, l'altitude), et le moteur-a-la variabilité de moteur.

En raison des limitations de fabrication et capacite, Bridges & Stratton peut substituer un moteur de plus haut pouvoir évalue pour ce moteur de Feuilleton.

Information de Classification de Pouvoir de moteur
